MIND TO MODEL

AI IMAGE GENERATION

OBJECTIVE :

Participants will be provided with a reference image (raw image) and must craft a text prompt to generate an AI image that most closely resembles the reference using a text-to-image model (Sora).

RULES :

1. 40 minutes to study the reference image and create the prompt.
2. Participants may preview and regenerate images within the given time, but must submit only one final image.
3. Any form of malpractice (unauthorized tools, collaboration) will lead to disqualification.
4. Verified technical issues (system crash, internet outage) may grant extra time at the organizers' discretion.
5. In case of a tie, a second round will be held with a new reference image and a shorter time limit.
6. All decisions by judges and organizers are final.
